The converted files in Lightroom can be exported as JPEG2000, JPEG and PNG. The Lightroom 3 database also supports hand-picking with the Smart Brush, which is similar to the Live Brush (formerly the Fuzzy Selector). Yes, we have a smart paint tool instead of a smart brush tool. Other important new features that come with Lightweight Highlights: Old and New, Exposure Plates, Instant Export, Color Sliders, Email – and even an Adobe Connect (beta) button to view a participant's desktop as they edit and input comments. Well, I don't know about that. I do happen to like the new UI, though. Thanks. At first, I thought that Lightroom looked like the "cleaner" and "easier" version of Photoshop. I believe that it is still a bit too simplified and largely looks one-dimensional, though. Lightroom is faster than Photoshop, that's for sure. Why even bother learning all those different shortcuts and keystroke sequences if Photoshop can do just as well, if not better at the same time? Admittedly, it is much more dominatingly "control-centric". But it could be that Lightroom is not "ready" to deal with the increased complexity in Photoshop. We never know. Perhaps once we start importing catalogs from our cameras, the advantage switched over to Photoshop. Or perhaps the two UI approaches will meld some day, although, I cannot imagine that happening today. Personally, I've adopted a slow-and-steady growth of Lightroom. So you may have noticed a lack of user reviews unless you use the beta and log in. I've had to add this feature to lightroom.net, because many users really appreciate a chance of automation and yet, the majority of companies and individuals do not have any registered names, thus, would be the first to appreciate this feature. Unfortunately, I don't have access to an automated software delivery program. I suppose that when Lightroom 5 is released, it will be available to pay for customers outside of the beta. I look forward to purchasing our copy, but it is currently unavailable. Sure, there are a few bugs in Lightroom 3 beta, but (until this content enters beta) there are no Photoshop bugs. I can not see the future, but I will share with my readers what will happen later.
